What is ENpower's Composite Skills Lab?

Implementation of Composite Skills Lab is not just infrastructure. Schools need to synchronise Infrastructure, Curriculum Frameworks, Teacher Capacity, Timetable Integration, Assessment & Documentation, and Annual Showcase (Kaushal Mela). And doing all this while nurturing the joy of learning among children is the real challenge.

That's where traditional STEM or Skill Programs fail. CSL is not about compliance or creating mandated projects. It is about building Problem-solving Ability, Developing Design Thinking, Encouraging Entrepreneurial Mindset, and Connecting Skills to Real-world Contexts.

ENpower presents a complete, school-wide implementation model for Grades 6–8, it integrates CBSE-aligned infrastructure, the Kaushal Bodh framework, Design Thinking, and Entrepreneurship into 110+ hours of experiential learning, where students work on real-world problems (not just science projects).

ENpower CSL synchronises curriculum, integration with school calendar, teacher capacity building, competency-based assessment, and annual showcases, making it a connected learning system that builds problem-solving ability, confidence, and future readiness among students.

One-stop solution for Kaushal Bodh & CSL Mandates

ENpowers 8 step implementation process

Choose Your CSL Implementation Path

Move from CBSE compliance to future-ready learning whenever you are ready. If you are looking to implement CSL smoothly and meet CBSE requirements with a structured, guided setup - Start with Foundation & upgrade to Plus when you want to go beyond compliance and build Design Thinking Skills, Entrepreneurship Mindset , student portfolios, and visible innovation outcomes.
